

Adobe Muse CC course

Level: Beginner

Duration: 2 Days

Design and publish HTML websites without writing code.

Adobe Muse software enables designers to create websites without writing code. Use master pages, built-in tools for interactivity, and access to over 400 web fonts served by the Adobe Typekit service to easily produce distinctive, professional HTML websites.

Who is this course for?

Adobe Muse CC course is ideal for people new to web design or people who have used it in the past but want to get up to speed with new features and techniques.
